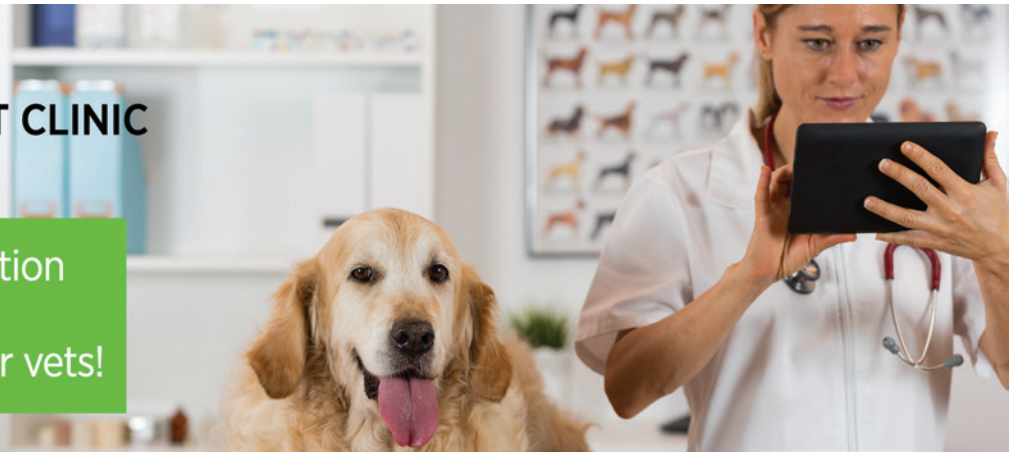
SayIt™ FOR YOUR VET CLINIC



Save 25% or more documentation time everyday with SayIt™- the speech recognition solution for vets!

Where would you rather spend your time, Typing or Treating?

No-brainer, right? But, how? With SayIt™ — the accurate and affordable speech recognition solution for vets.

See for yourself why SayIt is a no brainer for your veterinary practice.

SayIt™ speech recognition from nVoq can help you save 25% or more documentation time each day! Just point your cursor to where you'd normally type and "SayIt". Your speech becomes text in seconds – stored right in the system of record. Even drug names and veterinary terms.

SayIt is more accurate, flexible and less costly than competitors!

- SayIt works anywhere there's an Internet connection.
- SayIt is cloud-based, you don't have to install any software! No IT experts required.
- Use with your Mac AND your PC — use your iPhone for a wireless mic!
- Try before you buy, pay as you go. No-obligation trials available.

SayIt from nVoq is a cloud-based speech recognition solution that makes clinical documentation less painful. Real time dictation accurately converts the spoken word to text in seconds. SayIt is hosted securely in the Microsoft Azure Central Canada Data Centre. and supports veterinary specialties.

With no-risk trials and affordable subscription pricing, see for yourself the difference SayIt can make in your practice.
